MATHEMATICS MAGAZINE

Index to Volume 25 September 1951 - June 1952

Articles by Title

	Page
A Background of Understanding for General Mathematics Richard Madden	229
A Development of Associative Algebra and an Algebraic Theory of Numbers, I - H. S. Vandiver	233
A Geometric Perpetual Calendar - Marlow Sholander	275
A Postulational Treatment of the Probability for Certain Types of Emissions - Walbert C. Kalinowski and Francis Regan	175
A Proof Schema for a Class of Theorems - Gene F. Rose	1
An Algorithm on Divisibility - N. A. Draim	191
A Simple Game - Robert E. Horton	53
Arithmetic - Algebra - Geometry Each as an Aid to the Study of the Other - W. W. Rankin	263
Automatic Computation as an Aid in Aeronautical Engineering - John Lowe	37
Comments on a Note by Mathis - Vol. 24, No. 4 - H. K. Humphrey	54
Complex Variable Theory - Edwin F. Beckenbach	7
Cosets in a Semi-Group - Milo W. Weaver	125
Exterior Ballistics - John W. Green	87
Formula for Finding the Day of the Week - John Hoeck	55
Foundations of Operator Mathematics - Jerome Hines	251
Games of Strategy - M. Dresher	93
Infinite Series and Taylor and Fourier Expansions Robert C. James	269
Mathematics and the Space Time Problem - Roger Osborn	147
Mathematical Careers in Military Research - John W. Odle	159
Omega - William R. Ransom	277
On a General Trihedron of a Curve - Alex. J. Yannopoulos	189
Opportunities in Insurance for the Mathematically Trained Harwood Rosser	205
Powers of Sums and Sums of Powers - Pedro A. Piza	137
Some Notes on the Limit Concept - John B. Hart	163
Some Probability Estimates from Contingency Tables C. D. Smith	59
Some Relations Involving Special Functions - L. I. Deverall and C. J. Thorne	183
Statistical Quality Control - John M. Howell	155
The Differential Analyzer - Don Lebell	203
The Early Training of Mathematical Research Workers W. W. Sawyer	226
The Extension of a Particluar Matrix of Continuous Functions - H. F. Mathis	3
The Log Log Scales of the Slide Rule - E. L. Eagle	101
The Non-Euclidean Projectile - Curtis M. Fulton	143
The Osculating Conics of Physical Systems of Curves Edward Kasner and John Decicco	117
The Transfer Distribution - John Freund	63
The Use of Conics in Airplane Design - L. J. Adams	195
Unified Freshman Mathematics - S. E. Urner	29
Vector Analysis - Homer V. Craig	67
What Mathematics Means to Me - Lewis Bayard Robinson	115
What We Mean by Mathematics - Nilos Sakellariou	51

Articles by Authors

The digit after the author's name indicates the number of this volume in which his biographical sketch appears. When the digit is missing, the sketch was published in a previous volume or will be published later if possible.

Adams, L. J., 4, The Use of Conics in Airplane Design 195
Beckenbach, Edwin F., 1, Complex Variable Theory. 7
Craig, Homer V., 2, Vector Analysis 67
Decicco, John, 3, The Osculating Conics of Physical Systems of Curves, (with Edward Kasner). 117
Deverall, L. I., 4, Some Relations Involving Special Functions, (with C. J. Thorne) 183
Draim, N. A., 4, An Algorithm on Divisibility 191
Dresher, M., 4, Games of Strategy 93
Eagle E. L., The Log Log Scale of the Slide Rule. 101
Freund, John, 2, The Transfer Distribution. 63
Fulton, Curtis M., 3, The Non-Euclidean Projectile. 143
Green, John W., 5, Exterior Ballistics. 87
Hart, John B., Some Notes on the Limit Concept. 163
Hines, Jerome, 5, Foundations of Operator Mathematics 251
Hoeck, John, Formula For Finding the Day of the Week. 55
Horton, Robert E., A Simple Game. 53
Howell, John M., 4, Statistical Quality Control 155
Humphrey, H. K., Comments on a Note by Mathis, Vol. 24, No. 4 . . . 54
James, Robert C., 5, Infinite Series and Taylor and Fourier Expansions 269
Kalinowski, Walbert C., 4, Postulational Treatment of the Probability for Certain Types of Emissions, (with Francis Regan) 175
Kasner, Edward, 3, The Osculating Conics of Physical Systems of Curves, (with John Decicco) 117
Lebell, Don, 4, The Differential Analyzer 203
Lowe, John, 1, Automatic Computation as an Aid in Aeronautical Engineering 37
Madden, Richard, A Background of Understanding for General Mathematics. 229
Mathis H. F., 1, The Extension of a Particular Matrix of Continuous Functions 3
Odle, John W., 5, Mathematical Careers in Military Research 159
Osborn, Roger, 3, Mathematics and the Space Time Problem. 147
Piza, Pedro A., 3, Powers of Sums and Sums of Powers. 137
Rankin, W. W., 5, Arithmetic - Algebra - Geometry Each as an Aid to the Study of the Other 263
Ransom, William R., Omega 277
Regan, Francis, 4, Postulational Treatment of the Probability for Certain Types of Emissions, (with W. C. Kalinowski). 175
Robinson, Lewis Bayard, What Mathematics Means to Me. 115
Rose, Gene F., 2, A Proof Schema for a Class of Theorems. 1
Sakellariou, Nilos, 1, What We Mean by Mathematics. 51
Sawyer, W. W., The Early Training of Mathematical Research Workers. 226
Sholander, Marlow, A Geometrical Perpetual Calendar 275
Smith, C. D., 2, Some Probability Estimates from Contingency Tables 59
Thorne, C. J., 4, Some Relations Involving Special Functions, (with L. I. Deverall). 183
Urner, S. E., 2, Unified Freshman Mathematics 29
Vandiver, H. S., 5, A Development of Associative Algebra and an Algebraic Theory of Numbers, I. 233

Weaver, Milo W., 4, Cosets in a Semi-Group 125
Yannopoulos, Alex. J., 5, On a General Trihedron of a Curve. 189

Current Papers and Books

Basic Mathematical Analysis. By H. Glenn Ayre. McGraw-Hill Book Co., New York, 1950. $5.00. Lloyd L. Larsen 56
Brief Course in Analytics. Revised Edition. By M. A. Hill, Jr. and J. B. Linker. New York, Henry Holt and Company, 1951. XI + 224 pages. $2.40. W. H. Bradford 274
Die Entwicklungs-Geschichte Der Leibnizschen Mathematik. By Jos. E. Hofmann. Leibniz Verlag Munchen, 1949. 252 pages. Lloyd L. Larsen 57
Elements of Ordinary Differential Equations. By Michael Golomb and Merrill Shanks. McGraw-Hill Book Co., New York, 1950. ix + 356 pages. $3.50. Lloyd L. Larsen 56
General Homogeneous Coordinates in Space of Three Dimensions. By E. A. Maxwell. Cambridge University Press, New York, 1951. $2.75. R. C. Sanger. 166
Infinite Matrices and Sequence Spaces. By Richard G. Cooke, Macmillan and Co., London. 1950. 347 pp. R. P. Agnew. 211
Introduction to the Theory of Statistics. By Alexander McFarlane Mood, McGraw-Hill Book Company, Inc., New York, 1950, XIII + 433 pages, $5.00. R. F. Graesser. 273
Mathematics at Work. Edited by William A. Gager, University of Florida. Published by W. W. Rankin, Mathematics Department, Duke University, Durham, North Carolina. 1949. 128 pages. $2.00. Clifford Bell 57
Tables to Facilitate Sequential t-Tests. By Kenneth J. Arnold, National Bureau of Standards Applied Mathematics Series 7, xix, 82 pages, 45 cents (order from Government Printing Office, Washington 25, D.C.). 166
The Arithmetic Theory of Quadratic Forms. By Burton W. Jones, Carus Mathematical Monograph, No. 10, Math. Assoc. of America, 1950, 212 pages. Morgan Ward. 105
The Human Use of Human Beings. (Cybernetics and Society). By Norbert Wiener. Houghton Mifflin Company, 1950. Pp. 242. D. L. Miller. 213
The Theory of Algebraic Numbers. By Harry Pollard, Carus Mathematical Monograph, No. 9. Math. Assoc. of America, 1950, 142 pages. Morgan Ward 105

Problems and Questions

Contributors

Numbers refer to pages. Bold type indicates a problem solved and solution published; italics, a problem solved but solution not published; ordinary type, a problem proposed.

Solutions

The page on which a solution appears is in the parentheses following the number of the problem.

73(44), 74(281), 83(169), 84(45), 85(46), 87(282), 88(47), 89(108, 169), 90(283), 92(216), 93(109), 94(48), 95(171), 96(111), 98(172), 99(112), 100(172), 101(216), 102(219), 103(113), 104(219), 105(220), 106(221), 107(222), 108(223), 110(284), 111(285), 112(286), 113(287).

Quickies

Q 42, 43, 44, 45 (49); Q 46, 47, 48 (50); Q 48 (114, 224); Q 49, 50 (114); Q 51 (173, 224); Q 52 (173); Q 53 (173, 224); Q 54 (173); Q 55, 56, 57, 58, 59 (224); Q 60 (225); Q 61, 62, 63 (289); Q 64, 65, 66 (290).
